Embodied Dialogues are structured healing movement explorations with some lecture.
We keep our focus as the Witness/Asker/Experiencer on the unfolding flow of energy, as we unfurl ourselves through our physical and vital bodies.
Simple but highly transformative movement patterns can bring incredible shifts in our bodies, our minds and our subtle energy patterns. The body knows where to go when you follow its design.

We will be focusing on the psoas/diaphragm connection as a foundational support to living as embodied essence, teaching physical practices that will help students develop deep core awareness and healthy vagal nerve tone as well as energetic experiences to live from the deep silence of our true nature.
